About Vincent Slot

Vincent Slot is a lawyer at AKD. Following his law and architecture studies he decided to specialise in civil law and structural engineering. Vincent advises clients on various types of agreements, such as contracting agreements (including integrated contracts), purchase and development agreements and lease agreements (business space, office space and retail space).

Vincent also helps clients to avoid and/or resolve legal disputes. He does this primarily in the field of infrastructure works, non-residential construction and leasing. Where necessary he litigates in these fields before the Arbitration board for the building industry [Raad van Arbitrage voor de Bouw] or the civil court. His clients appreciate his involvement and clear analyses.
